

Helps Global Organizations Communicate Effectively and Securely over the Internet

# Secure Mailbox™

*Kaonsoft Secure Mailbox™* provides secure and compliant communication means by connecting you and your contacts within a completely contained environment over secure network, where all messages and attachments are encrypted and exchanged while staged apart from an internal email or messaging system.

## Business Benefits

### Boost productivity

by helping employees perform their jobs and access corporate data anytime, anywhere

### Increase effectiveness

by making employees more accessible and responsive using email on-the-go

### Maximize security

by staging and maintaining own message repository, thus adding an extra layer of data protection

### Improve engagement

of employees with real-time communication and information sharing

### Secure documents

with Kaonsoft DocConverter & Viewer™, a companion solution for easy document conversion and secure viewing

### Optimize ROI

with the use of popular email servers or corporate legacy systems side-by-side

# Kaonsoft Secure Mailbox™ for

## Features

### Secure Inbox

- Messages and files are staged apart from sources (e.g. Microsoft Exchange) with AES-256 encryption.
- No information is stored in the device's local storage.
- Complete messaging features of any email solutions are provided - inbox, reply, forward, archive, etc.

### Secure Document Viewer

- Supports attachments of most file formats – CAD, Word, Excel, PDF, Hwp
- Converts attachments on-the-fly and encrypts them into undecipherable images which only the Viewer can display
- Utilizes streaming technology which prevents original source file from being captured or saved locally on mobile device

### Staged Mailbox

- Completely decoupled from corporate system, this adds an extra layer of protection for corporate messaging system.
- Thanks to Kaonsoft Adapters™, the corporate system could be a popular email server such as Microsoft Exchange, or any of the systems Kaonsoft Adapters™ support, for example, SharePoint, CRM, Excel or plain old XML flat files.

## Technical Specifications

- iOS, Android and Windows Phone support
- Integration with any back-end system
- Web-based administration portal
- Built-in security & user authentication
- Real-time data synchronization
- Remote software updates
- Data recovery & wipe for lost/stolen devices
